

How to Buy Modafinil Online Using Bitcoins

With the advance in digital currency (or “cryptocurrency”) technology over the last decade, “Bitcoin” has become a household word. But what exactly is it? **Where can you buy Bitcoin?** And **how do you use Bitcoin to buy products like modafinil online?** In this article, we answer all of these questions and more. We’ll even show you how to get \$10 for free when you [create your first Bitcoin wallet](#)!

But first, a brief disclaimer. . . .

Medical Disclaimer

This article is intended for educational purposes only. Research has shown that modafinil is highly effective at enhancing cognition with few to no serious side effects. Nevertheless, doctors will only prescribe it as treatment for specific conditions: namely, narcolepsy or other sleep disorders. For this reason, many students and professionals choose to purchase [modafinil online](#). As with any supplement or drug, of course, you should consult your doctor or other health care provider before taking modafinil.

What is Modafinil?

What is [modafinil](#)? What are smart drugs or nootropics? Where can I learn more about modafinil and order some to try?

Chances are, you didn’t end up at this article by accident. So, you probably already know what modafinil and nootropics are. But just in case you’re new to the whole cognitive enhancement movement, here are some important terms:

nootropics (*noun*) – also known as ‘smart drugs,’ ‘smart pills,’ or ‘cognitive enhancers,’ these are “drugs, supplements, or other substances that improve cognitive function, particularly executive functions, memory, creativity, or motivation, in healthy individuals.” [1]

modafinil (Provigil) (*noun*) – a prescription medicine for narcoleptics that increases alertness, focus, and motivation. It just so happens to also increase cognition and memory, and is a highly regarded supplement in the category of nootropics. [2]

uber-productive, kick-ass mother-f*cker (*adj + noun*) – what you’ll become after taking modafinil—think Eddie Mora from *Limitless* but a bit more realistic.

Where to Buy Modafinil Online

Modafinil can be purchased from several online vendors, but we recommend [Modup.net](#). They are, in our opinion, the most reliable vendors—not to mention, the most affordable. They are also the only seller to offer Modvigil, which is the only independent, third-party-tested modafinil generic. (In other words, it’s the cream of the crop.)

Simply select how many and which brand of pills you want. Then, Modup will ship the modafinil straight from the manufacturer to your door. Shipping takes about 2 weeks to the U.S., and your package is protected against theft, loss, and confiscation by customs (Modup will issue a refund or send you a free replacement order—your choice).

Why Buy Modafinil with Bitcoins?

Now that you’ve decided that you want to try modafinil, and you know where to buy it . . . it’s time to discuss Bitcoin.

Bitcoin is a form of digital currency, otherwise known as ‘crypto-currency’ (because of its high level of encrypted security). **Crypto-currency is the future of currency.** There is no doubt about it.

Every day, over \$750 million is transacted in bitcoins – and that number is quickly increasing. Due to growing adoption of digital money around the world, the value of Bitcoin is also soaring.

In August 2016, you could buy one bitcoin for about \$600 USD. Now, just one year later, one bitcoin is worth about \$3300 (and rising)!

Besides being an excellent investment, Bitcoin is a great way to pay for things like [modafinil online](#). Here are just 4 of the many advantages of Bitcoin over traditional currency:

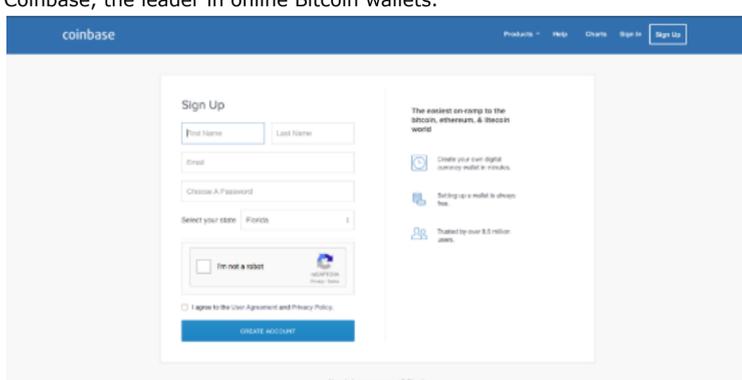

- Speed:** Sending and receiving Bitcoin takes only a few minutes. Sending and receiving online payments in fiat currencies takes days.
- Security:** Bitcoin is backed up by a financial ledger (known as a *blockchain*) that is encrypted, so your transaction is 100% secure (i.e. none of your personal information is stored on the blockchain, unlike a credit card).
- Decentralization:** The blockchain is a *decentralized* network, meaning there isn’t any bank or governing body behind Bitcoin.
- Discounts:** Last but not least, you can get enormous discounts just by paying in Bitcoin. In the case of modafinil, Modup offers a **33% flat discount on payments made in bitcoins**—that’s more than any other online seller.

How to Buy Modafinil Online Using Bitcoins

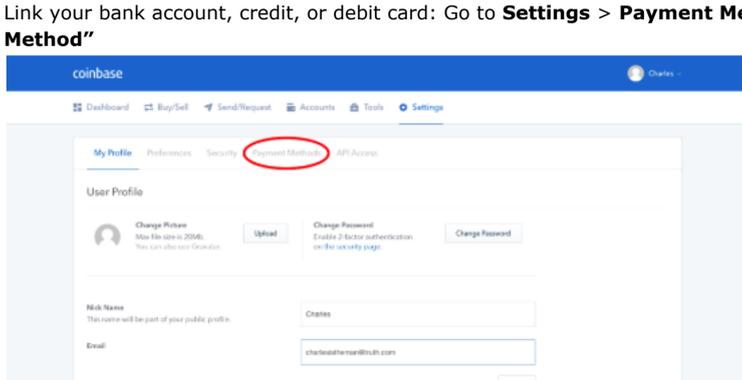

Now that you’ve learned about the benefits of Bitcoin and (hopefully) chosen Bitcoin as your means of buying modafinil, let’s discuss how to actually do that.

How to Get Bitcoin (and get \$10 for FREE!):

- First, sign up for a free [bitcoin wallet](#) (It’s like PayPal for digital currency). [Click here](#) to sign up with Coinbase, the leader in online Bitcoin wallets.

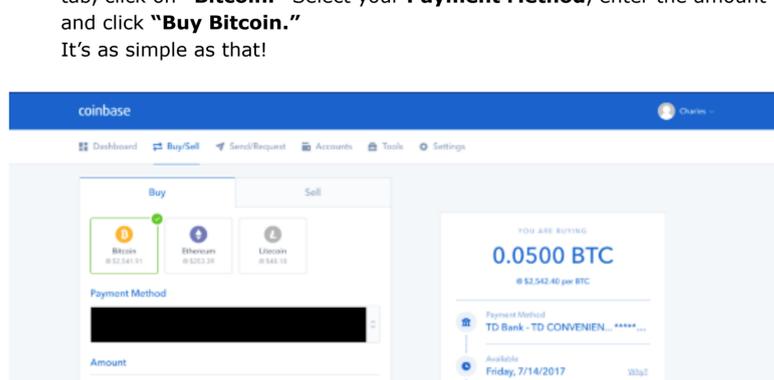

- Link your bank account, credit, or debit card: Go to **Settings > Payment Methods > “Add Payment Method”**

- Once your account is set up, you’ll need to purchase at least \$100 worth of Bitcoin in order to receive your free additional \$10. To do this, simply go to the **Buy/Sell** tab at the top of the page, then under the **Buy** tab, click on **“Bitcoin.”** Select your **Payment Method**, enter the amount you want to receive in Bitcoin, and click **“Buy Bitcoin.”**

It’s as simple as that!

Now that you have some Bitcoin, you can easily use it to buy modafinil. **Simply go to [Modup’s website](#) and [follow the information in this blog post](#).**

And that’s it! **Congratulations on making your first Bitcoin purchase!**

Modup will confirm your order and payment by email. From there, you’ll receive updates on your package as it travels from India to your doorstep. **Best of luck on your journey to better productivity!**
